Welcome

I am a motivated **B.Sc. Engineering (Hons)** undergraduate specializing in **Electrical and Electronic Engineering** at South Eastern University of Sri Lanka, with a strong passion for **Artificial Intelligence (AI), Machine Learning (ML), and Data Science**. I have hands-on experience in developing AI/ML solutions, signal processing, data analysis, and embedded systems using **Python** and modern machine learning frameworks. I am eager to apply my analytical, programming, and problem-solving skills to develop intelligent, data-driven solutions while contributing to innovative AI projects and continuously expanding my expertise in the field.

Education

BSc (Honors) in Electrical & Electronic Engineering

Aug 2022 – Present

South Eastern University of Sri Lanka

- GPA: 3.3/4.0

Experience

Artificial Intelligence(AI) Engineer (Intern) . 📄

Colombo, SL

Sri Lanka Telecom

Aug 2025 – Oct 2025

- Developed RESTful APIs using Python (Flask) and built intelligent workflow agents with n8n, LangChain, and LangGraph, supporting automation and AI-driven solutions.
- Implemented tracing and monitoring with LangSmith, contributing to research projects that applied AI/ML and automation in telecommunications.

Software Engineer (Intern)

Colombo, SL

Sri Lanka Telecom

May 2024 – Aug 2024

- Contributed to full-stack development for a product management system at **Digital Platform - Sri Lanka Telecom** 📄, using Flutter, Dart, and ensuring seamless API integrations
- Gained experience in front-end and back-end development, database management, version control (Git), and participated in agile cycles and team code reviews.

Projects

Industrial Engineering Project - PowerProx(SL Telecom)

May 2024 - Aug 2024

- Developed and enhanced UI features using Flutter and Dart, integrating RESTful APIs for real-time asset tracking and updates.
- Improved inspection workflows and implemented Gemini API for efficient quotation retrieval and processing.
- Tools Used: Flutter,Dart,Gemini API,Generative AI 📄

Elephant Detection Using Seismic Signals

Ongoing

- Developed a ground-based detection system using Geophone sensors to capture seismic vibrations from elephant footsteps, with signal amplification and filtering using an Instrumentation Amplifier to enhance low-frequency ground signals.
- Processed collected seismic data and trained a Machine Learning model using Python to identify elephant movement patterns and distinguish them from other ground vibrations for real-time early warning detection.
- Tools Used: Geophone Sensors, Instrumentation Amplifier, Python, Signal Processing, Machine Learning.

Smart Route Optimization System . 📄

May 2025 -May 2025

- Built a Flask-based route optimization system using Dijkstra's algorithm and Google Maps API to compute efficient multi-stop routes.
- Enabled real-time map visualization and optimized paths by travel time/distance, suitable for logistics,

tourism, and ride-sharing applications.

- Tools Used: Python ,Flask ,Rest API ,Google Map API

Accommodation Booking Mobile App . [🔗](#)

Apr 2025 - Jan 2026

- Developed a Flutter-based mobile app for listing and finding accommodations with secure user authentication using Firebase.
- Built RESTful APIs using Flask with Mongodb for data storage, enabling image uploads and real-time property listing updates.
- Tools Used: Mongodb,Flask,Flutter,Dart,python

Certifications

Advanced Learning Algorithms [🔗](#)

Jun - 2026

- Issued by: DeepLearning.AI on Coursera

AI / ML Engineer - Stage 1 [🔗](#)

Apr - 2025

- Issued by: Centre of Open and Distance Education - SLIIT

AI / ML Engineer - Stage 2 [🔗](#)

Apr - 2025

- Issued by: Centre of Open and Distance Education - SLIIT

Supervised Machine Learning - Regression and Classification [🔗](#)

Jul - 2024

- Issued by: DeepLearning.AI on Coursera

AgniXtream Hackathon Competition [🔗](#)

Dec - 2024

- 1 Runners Up at 6 hours Hackathon
- Issued by: IEEE Sri Lanka Section

What is Data Science [🔗](#)

Aug - 2023

- Issued by: DeepLearning.AI on Coursera

Python for Beginners [🔗](#)

Jun - 2022

- Issued by: University of Moratuwa

Technologies

Languages: Python ,Dart , C++

Technologies: Sk-Learn ,Flutter, Tensaflow, LangGraph, LangChain,N8N, Matlab,ESP32 ,n8n
